The vision of this school is: promisingly provides a world class comprehensive education with a global perspective. Its mission is to empower our wards, comprehending international academic infrastructure, imparting multinational cultures, languages, pedagogy, arts, sports and multi-variant life skills to outsmart in their own world to become world class citizens with Indian Ethos. The motto is Learn to Lead : Lead to Legacy.

The academic year 2022 – 2023 began on June 3, 2022 followed with orientation for parent on June 4 for parents of Grade I to IV and on June 5 for Grade V to IX. The curriculum followed is that of CBSE and the pedagogy cratering to our learners of the 21<sup>st</sup> Century Skills. We have incorporated New Education Policy 2022 – 2023 in its true spirit. The areas of our focus has been on the following:

We have display boards in and out of our classrooms exhibiting student work. In lower classes students are taught using teaching aids. Stories, rhymes, singing with action, reciting poems and brain gym is a daily practice. Experiential learning is implemented by hands on activities to understand laws of science and mathematics. Students made models and conducted an Exhibition in the month of October, our students went for an educational field trip to Avin Dairy Plant. They witnessed how milk was transformed into sweets, butter, ghee and other products and its packaging. They also were taken to G D Museum. It was enlightening experience for them to witness how science and technology in every walk of life such as communication, automobiles, tools, cameras and variety of items have evolved. Many theory's that are taught to them in class were seen in action. During daily morning assembly's students are introduced to a word a day, its meaning and usage in sentences. The culture of the school is to encourage everyone to speak in English.

Students collecting items from to real life where ever application like feathers, rocks, pulses, leaves, flowers and many more things to practically test and apply concepts. They collect data, collate and predict what the outcome would be. In every subject worksheet containing additional information is discussed with the students. Special edition of newspaper only for students printed called News in Education given for students from grade four onwards. It is a practice by every teacher to introduce the students with that the learning outcome before teaching the class. Students are given opportunity to stand in the front of the class and express confidently their thoughts and ideas. They are mentored and individual attention is given both during after school timings. We also have a guidance counsellor who helps

students whenever they find it difficult to grasp or find it challenging to comprehend. Regular feedback is taken from students, parents, teachers both formally and informally and necessary steps taken to ensure learning happens to its maximum.

We conduct Ed elocution and essay writing competition for different events like celebrating Kamarajar Birthday, Independence Day, Gandhi Jayanthi. An intensive handwriting training program was conducted in every class for both students and teachers to improve their penmanship skill. We have noticed remarkable change in the handwriting in all the three languages.

Two years of online classes have forced all of us to effectively use technology for the teaching and learning process. This has been a blessing to all of us because knowledge is accessible at the comfort of our location through different search engines via internet. We have tried to make our students sensitive towards use of technology and social media and how to filter the right information without much distraction. Students have access to internet at school. This institution is blessed with having the support of Extra Marks and their resources available online. Teaching learning process caters to our students to experience all four learning styles. The management has provided us with resources to cater to them. Visual, Auditory, Kinaesthetic, along with Reading and Writing Learning styles. We have access to internet in our classrooms so as to call them smart classes The Robotic Lab is a leap, we take today in developing our curriculum so that our students can now learn programming, coding, drone technology, use of sensors and also digitally design thinking.

We the teaching staff of Thaamarai World School have constantly being upgraded to not just to meet the demands of education in India but in being capable to meet international standards. Our teachers are continuous trained by well-known educators. Dr. Sendhil Kumarn, Dr. Raghvan, Dr. Shaktivel, Mr. V Venkatachalam a national awardee and also from CBSE. Continuous workshops by our service providers such as Oxford University Press, Orient Black Swan, Cambridge, Extra Marks, and many more online trainings from both open and paid sources.

We have regular soft skills training customised to the grade level. Students have experienced dirtying their hands on the wheels of the potter and make their own cups and pots. They plant trees. Every student learns music both vocal and instrumental. They are trained by experts in the field of Chess, Karate, Silabam and sports. Our students test their skills by participating at interschool competitions such as Chess, Drawing, Art, Handwriting, Essay Writing, Kho-kho and quiz.

We have had activities in school for students to identify the talent they possess and train them accordingly. They play carrom board, fuse ball, table tennis, and at the park. One class is physical education per day is given for our learners to stay fit and healthy. From grade six onwards we have foundation courses taken by experts enabling them to prepare towards any competitive

**examinations such as NEET, JEE, IAS. We attempt to expose our students to area of their interest and train them with fashion design, home economics, agriculture, drone technology and design thinking.**
